Getting Started

There are tens of thousands of people searching online everyday for "subliminal messages", "subliminal messaging", "subliminal mp3s" etc - not to mention specific areas such as "improving confidence", "weight loss" and so on. On a very basic level all you will be doing is placing yourself between people searching for terms like this, giving them some information, pre-selling them, and sending them on to us a little warmed up.

You will earn commission for every sale made on the traffic you send us.

We pay 75% Commission, and with over 150+ albums, regular promotions, and dedicated marketing / conversion optimization from our end the potential is unlimited - people often try an album or 2 with us, and a large number of them come back and try more, therefore giving you repeat commissions over the longer period too.

Something for Everyone!

We are essentially a self help / personal development webstore - we have something for everyone. Whether your customers want to quit smoking, lose weight, improve their health, boost their confidence, work with the law of attraction, or pursue success in almost any area we have an album which can help.

Therefore as an affiliate you can be successful with us from pretty much any niche. You can successfully promote us and earn great commissions whether you have a general personal development website, or if you are more focused on one specific area - perhaps positivity, or weight loss, or motivation etc; in this scenario you can recommend specific albums tailored to the interests of your market. We find both approaches work very well, and we have proven, pre-written articles to help you get started whatever your area of expertise is.

Even if you only have this small niche website focused on one area what we find is that people visit us and try the album they are most interested in - perhaps weight loss for example, and after a few days / weeks they learn more about subliminal messaging and try further albums in wider areas.

Creating Content

This section will help you get started in creating content for your blogs, mini sites, review pages, and article submissions etc.

We have a lot of pre-written articles for you to use. The first place to go is to our "[Affiliate Success Pack](#)". This basically consists of 3 articles which have been tried and tested to get people clicking through to us and buying from us. These can be the core of your website, or they can be used in your email marketing to great success (more on email marketing further on).

Unique Pre-spun Articles!

We are committed to giving you leading article marketing materials and add more articles every month. **We have a ground-breaking free "spinning" tool here which contains a LOT more free articles which are PRE-SPUN for uniqueness - with your affiliate link already embedded!** We have more articles on subliminal messaging generally, or if you have a site which is more specific to one particular area of health, or personal development we also have a articles about specific products / niches i.e. subliminal messaging and the law of attraction / and weight loss etc.

Using these pre-spun articles means you are not competing to rank on the search engines with other people using the same article and will make it easier for you to get found.

[Visit Our Affiliate Articles & Email Marketing For Unique Articles](#)

We add to our articles collection every month, but if you want to write your own content still you can use these articles as a guide. You should see a general style of writing which you can write more similar articles from, or expand upon to write about our other subliminal products / niches. If in doubt you could also get more ideas for articles from the product pages for the albums you wish to promote and write articles such as "How To... *lose weight / increase your confidence / achieve success etc ...With The Power of Subliminal Messages*" style articles.

Remember that when writing about specific niches you will get a better conversion rate if you use our [deep link generator](#) to link to the specific relevant product rather than just our homepage. For best results you should also do your keyword research and find out what keywords people are searching for and include these in your article title - you can read more information about keywords and research on our [Affiliates Keywords Page](#).

Testimonials

Creating simple articles about how subliminal messaging can help will work - it will get people interested, curious to try more and clicking through to our website. However, if you can combine this with experiences from real people, with your own experiences, or if you

can get stories from users of your website / blog and publish these then this will add an extra level to your efforts.

It is one thing for me to explain how our albums work, or for you to setup a website / blog on subliminal messaging, but to hear personal stories of success makes it real for people and adds credibility.

“ I was very skeptical at first and just enjoyed the sounds of ocean waves - I live on a sailboat most of the year but am presently in Bangkok!! - but have found a subtle but perceptible difference in myself - a bit like the effect of daily meditation which I always describe as an invisible gas.

Dennison Berwick, Bangkok, Thailand

Blogs

Blogger (aka Blogspot): Very simple to setup, and designed with beginners in mind. It is quite customisable, and you can insert images, banners, and make your blog look unique. You can either host your blog directly on the blogspot domain, or you can buy your own domain and just use the blogspot system.
<http://www.blogger.com>

Wordpress: Arguably more advanced than blogspot. It is the "ultimate blog" format and is completely customizable - you can make it look more like a "real website" than just a blog. It is a little more technical to setup and customize than blogspot, but anyone with a little online experience should be able to manage. You can also either host your blog directly on the wordpress website, or buy your own domain and just use the wordpress software.
<http://wordpress.org>

There is other blogging software available, but between these 2 you have something for beginners, and with wordpress you can do anything you want.

* With either of these blogging platforms you can host your blog on their server as something like <http://www.magic-subliminal.blogger.com> or you can host it yourself by buying the domain and use <http://www.magic-subliminal.com> itself. If you are a serious affiliate we do recommend buying your own domain name - this will make you look more professional, perhaps even an authority figure, and help you to build a brand image.

Article Marketing

Article marketing is the place to start with in our humble opinion. We have done a lot of article marketing ourselves to bring new traffic to our site and to make sales. It can be a really consistent way to generate traffic and recurring sales.

Our recommendations: Generally it is best to go either 2 ways - either submit your article everywhere if you are using an automated tool, or if you are doing it manually just pick a few high ranking article directories to submit to. [Ezine Articles](http://EzineArticles.com) is a league above the others and you should always try to get your articles submitted there as it will generally bring 3x as much traffic as anywhere else.

Automatic Article Submission Programs

If you want to submit to a lot of article directories (or if you regularly post a lot of articles) then automated submission is often the way forward. You lose a little control, but it will save you a lot of time. Here are a couple of programs we recommend, they are all similar and basically you input your article, your author name, summary, and resource box into their software and it will do the submissions for you.

1. **Articlebot:** <http://www.incansoft.com/IS0030.php> - **Our top recommendation** - a well supported and regularly updated article submission tool from Incansoft. This latest version supports article spinning, and we can't recommend the support team at Incansoft highly enough. Price is around \$25 but well worth the investment for serious article marketers.
2. **Article Submitter:** <http://articlesubmitter.imwishlist.com> - A solid product from Brad Callen - a very popular article submission tool. There is a free version with limited features or pay to upgrade to the full version.
3. **Unique Article Wizard:** <http://www.uniquearticlewizard.com> - A classic and well rated article submission tool.

Web 2.0 Sites

These are similar to blogs, but instead of a rolling diary format you just make one longer page / one focused article, and they can include images, videos and more interactive features.

You can use them how you wish or to review products and share information etc just as you would with a blog. They are also favoured within Google and the search engines so you can write an article and get it ranked pretty quickly too.

There are a range of other similar "Web 2.0" blogs / article sites such as:

- Squidoo: <http://www.squidoo.com> - Our recommendation - a simple article based system yet quite profound in the different things you can do. Page rank 8
- Weebly: <http://www.weebly.com> - "Create a simple website or blog within minutes". Page rank 8
- Ning: <http://www.ning.com> - growing in popularity with simple features and a social / sharing element. Page rank 8
- Live Journal: <http://www.livejournal.com> - a combination of a private journal, a blog, a discussion forum and a social network. Page rank 8
- Hubpages: <http://www.hubpages.com> - Another well rated Web 2.0 site, but quite strict in the number of outgoing links you can use
- Self Growth: <http://www.selfgrowth.com> - You can create a profile for you / your website here and establish yourself as an expert
- Tumblr: <http://www.tumblr.com> - a blogging / article / information sharing hybrid. Recommended. Page rank 7
- MyBlogLog: <http://www.mybloglog.com> - A blogging platform powered by Yahoo (Yahoo's answer to Blogspot?). Page rank 7
- Knol: <http://knol.google.com/k> - owned by google - write informational articles and "share what you know". Page rank 7
- 43 Things: <http://www.43things.com> - make a list of "43 things you want to achieve" - good for goal setting and personal development. Page rank 7
- Vox: <http://www.vox.com> - another well made blogging platform.. "everything you want in a blog". Page rank 7
- Now Public: <http://www.nowpublic.com> - a user generated NEWS site. Good for informational / news based articles. Page rank 7
- Zimbio: <http://www.zimbio.com> - another popular and well ranked blog / article hybrid. Page rank 6
- Gather: <http://www.gather.com> - presents itself as a social networking site but it is more of a "share your articles" site. Page rank 6
- Advogato: <http://www.advogato.org> - A simple article blogging / publishing site with social elements. Page rank 6

Using a variety of these Web 2.0 / article sites such as Hubpages, Squidoo, and some of the above will increase your coverage in the search engines. It is a good idea to target each site / article with just one or two keywords each. For example, you could have a page on Squidoo which is targeted for the keyword "Subliminal Messages", and other articles on other sites which focus on other keywords such as "Subliminal Learning", "Subliminal Audio" etc. It can be difficult to get one article to rank for too wide a range of keywords, but by creating several sites you can cover the search engines from different angles and increase your coverage.

Another method is to create one or two main sites - perhaps on some of the bigger sites (Blogspot, Squidoo, or whichever else you prefer), and then put smaller mini articles on some of the other "Web 2.0 sites" and article marketing websites and link back to your main site(s). Backlinks like this from other well ranked pages will help your website to gain authority and respect in Google's eyes and help you to rank better on the search engines.

Backlinks! (Important)

Whether you are using your own hosted website, a blog, article submissions, or various Web 2.0 websites you will need to "build backlinks".

All of the above sources are great places to put your content, but that is only one part of affiliate marketing - the real key to success with these methods is making sure your content gets found on the search engines, and that means creating backlinks to it.

A backlink is simply a link from another website to yours. This tells Google that your website is getting talked about, and linked to, and should be found in it's search engine.

It is important that the links use the keywords that you want to be found for - so instead of the link saying "for more information on subliminal messages [click here](#)", it should say "for more information on [subliminal messages](#) click here". In Google's eyes this shows that the page that links to you with these keywords is giving you its recommendation that you should be found for the term "subliminal messages".

This all goes hand in hand with creating different pages / articles which focus on different keywords - whatever the keyword is you are targeting this is what you want your backlink text to be.

Some Simple Backlink Generating Techniques

- **Blog Comments:** Search for blogs related to the subject you are talking about and leave a simple comment with a link back to your article / website.
- **Forum Posting:** Find relevant forum threads and post a reply with your link within the text. If you regularly post on a few forums you can also simply edit your signature to contain your backlink.
- **Social Bookmarking:** Quickly bookmark your site with some social bookmarking sites. [Only Wire](#) is one way to do this - it lets you create accounts at the different sites and then does automated submissions for you. [Social Marker](#) is another tool - it is less automated, but gives you more freedom to change the titles, link text, and descriptions for each site.

Getting More Advanced

For longer terms (perhaps a relatively uncompetitive longer term like "how to increase your self confidence fast") a few simple backlinks with the above methods might be enough to help you rank reasonably well - for something more competitive such as "subliminal learning" or "subliminal self help" you will need a lot more backlinks, and from QUALITY, and relevant sources.

One popular way of doing this is to create your primary content (the website / page which you want to rank in Google) - perhaps a Squidoo Lens, or a Blogspot Blog, or an article on Ezine Articles. Then copy this main article and post it to other article sites (such as listed in the top 20 list above) and make the links point back to your main page / main article. Re-writing your article a little bit also helps.

This works because when you duplicate your article like this only 1 copy will get found in Google, i.e. the copy with the most backlinks to it. By making the duplicated articles link back to the main one ensures it gets found, and pushes it higher up the search engine

rankings.

Email Marketing

Email marketing has proven to be one of **the most effective ways to promote our products**. Our website itself is very driven by our own email marketing efforts (you will be credited for all sales on people you refer to us and they join our list and buy later), simply because it works to bring people back to our site time and time again - for new album launches, and occasional discounts and product promotions.

If you have your own website or are in the process you should really consider offering a simple newsletter and giving an incentive for people to sign up (i.e. free stuff). Once you have a responsive list you can make regular, and repeat sales to them. You should setting up a regular auto-responder series based on our "[Affiliate Success Pack](#)", and make sure you sign up to our affiliate newsletter ([signup on our affiliates homepage](#)) - this will keep you informed of any upcoming sales, and new product launches and give you material to send out to your list every month.

Unique Pre-spun Articles!

We are committed to giving you leading article marketing materials add more articles every month. **We have a ground-breaking free tool here which contains a LOT more free articles which are PRE-SPUN for uniqueness.**

[Visit Our Affiliate Articles & Email Marketing For Unique Articles](#)

If you don't already have email software we recommend running your email list with [Aweber](#). It is the leading email marketing solution online, they help to make sure your emails conform to spam standards and guarantee a high delivery rate due to the relationships they maintain with the various email hosts. They also offer great support and step by step instructions for setting up.

Facebook Commenting

<http://www.facebook.com>

The Facebook logo, consisting of the word "facebook" in white lowercase letters on a blue rectangular background.

Another growing area in affiliate marketing is facebook. We are not talking about PPC on facebook here (this is covered below), but simply joining groups / fan pages on self help, personal development, positivity, hypnosis, happiness etc - there are groups for almost everything.

Simply join these groups and write a message recommending them to visit your site for further information. For example you might join a group about positivity and write a quick wall post along the lines of "Has anyone tried subliminal messages for positivity? This site offers 3 free subliminal audio albums: <http://www...>" "Great group, I've had some great benefits to my positive thinking efforts from subliminal messages - you can get 3 free subliminal albums here: <http://www....>"

If there isn't a group you could even make one yourself so you have full control over what is

posted.

* There are 1000s of open groups, however some may be commercial groups - i.e. owned by businesses who might not take kindly to affiliate posts about other businesses. They will probably remove them or may even complain about you - so make sure that the group isn't setup to promote one company specifically.

Twitter

<http://www.twitter.com>

Twitter can be a great way to send traffic to us - simple posts like "Download \$44.91 of free subliminal mp3s here: <http://www...>" / "I am currently listening to the new positive thinking subliminal album: <http://www..>" "24 hour only sale on Subliminal Mp3s: <http://www...>" work well to bring traffic to us and get them viewing our site. So if you have a responsive twitter list, especially if it is in the personal development niche this will work for you.

Yahoo Answers

<http://www.answers.yahoo.com>

Yahoo answers is gaining popularity as a tool for affiliate marketing. It is quite quick to browse through questions in a related niche and give a little information and a link back to us / your landing page for more information. Your response will be posted live, and if the question becomes popular or well ranked in Google (which can often be the case) you can generate a very healthy level of traffic.

Because of our wide product range you can answer questions on weight loss, relationships, confidence, self esteem etc and direct people to the relevant product using our [deep link generator](#), or the relevant page on your landing page - as well as of course answering questions about subliminal messages, hypnosis, self help, personal development etc.

Paid Traffic

We recommend trying the free traffic generation methods first with our program - especially if you are new to affiliate marketing, but once you gain an understanding of which keywords work for you and you can convert from your landing pages you can generate a lot more traffic, with less effort, and a lot quicker with PPC.

PPC Networks

The main sources of PPC traffic come from the "top 3" - Google Adwords, Bing, and Yahoo Search Marketing.

- Google: <http://www.google.com/adwords> - The largest source of PPC traffic online.
- Bing: <https://adcenter.microsoft.com> - Less competitive than Google and can bring a great ROI, a growing and increasingly popular network.
- Yahoo: <http://searchmarketing.yahoo.com/overture.php> - Also less competitive and another large source of PPC traffic.
- Facebook: <http://www.facebook.com/advertising/?src=pf> - Growing in popularity for affiliate based advertising.

There are many more PPC keyword based advertising platforms than just the 3 above. Each have their own systems, merits, and ways of working, and all can be highly profitable. Here are just some of the other PPC networks available:

- Adbrite: <http://www.adbrite.com> - One of the largest non core PPC networks.
- Miva: <http://www.miva.com> - A well rated PPC network.
- Adtoll: <http://www.adtoll.com>
- Thunder Text: <http://www.thundertext.com/?action=advertisers>
- 7 Search: <http://7search.com>
- Kanoodle: <http://www.kanoodle.com/about/advertise.html>
- Looksmart: <http://offers.looksmart.com/thought/> - \$100 voucher free upon sign-up.
- Searchfeed: <http://www.searchfeed.com>

You will be able to find \$50-\$100 starter coupons for most networks. Do a google search for "network name + coupon" as they change regularly.

Setting Up Your PPC Campaign

If you are new to affiliate marketing, or even new to promoting us we always recommend trying some free traffic generation methods (i.e. article based marketing) first. PPC can get expensive, and if you are not experienced you can lose money - even experienced PPC marketers often lose money when first implementing a new campaign; until they make some tweaks, get rid of what isn't working and do more of what is.

However, PPC can be a great way to get a lot of traffic, quickly. If you have some PPC experience, or once you have a better idea of which keywords convert really well for you, you can get extra traffic with PPC and enhance your efforts.

Keep Your Keywords and Ads Targeted and Focused

The most important thing to remember with PPC is that the more focus you have the better.

Create adverts with just a few related keywords. Don't have one advert which is linked to 100 different keywords. Only use a handful of related keyword terms and match them to each advert.

For example, you might have the keywords "subliminal mp3 / subliminal mp3s / subliminal downloads / subliminal download" linked with an advert like the following:

{KeyWord: Subliminal MP3s} 150+ Subliminal MP3s Only \$14.97 + Save up to 50%

Or if your keywords are "weight loss mp3 / weight loss mp3s / weight loss download / weight loss cd", then link these to a targeted advert like:

{KeyWord: Subliminal Weight Loss MP3} Lose Weight With Subliminal Messages Only \$14.97 + Save up to 50%
--

Create Focused Landing Pages

Once you have these targeted adverts it is important to send each one to a focused landing page. As mentioned above you can either use direct linking (i.e. buy a domain and simply redirect it so the traffic comes straight to us) - this is quicker and perhaps a good idea to do some initial conversion testing, or you can make your own landing page. Either way the adverts should go to different pages:

- With **direct linking** your general "subliminal mp3s" advert like the one above would go straight to our homepage, and the weight loss advert would go to our core weight loss product "Subliminal Weight Loss".
- If you have your own landing pages then your general "subliminal mp3s" advert should go to a page which gives more information and the benefits of subliminal messaging generally (before directing people on to our homepage), and your weight loss advert would go to a separate landing page which describes how subliminal weight loss works (before directing people on to our Subliminal Weight Loss product)

You can use our [affiliate link generator](#) to get your links to different products and make sure you are sending people to the right pages.

Keeping a focus like this in your advert creation, selection of keywords, and coordination of landing pages will make sure you are getting relevant traffic, and make sure the sources you are sending them to are of interest. **The bottom line is that it will increase your conversions.**

Sample Ads

It is always best to run a few adverts parallel to each other to see which ones get better click through, and conversion rates - you can monitor the conversion rate if you use different Tracking IDs for your different adverts by using our [deep link generator](#). Here are some adverts which have typically worked well for us:

{Keyword: Subliminal MP3s} 150+ Subliminal MP3s Only \$14.97 + Save up to 50%	{Keyword: Subliminal Messages} Life Changing Subliminal Messages Save 50% On MP3s Today!	{Keyword: Free Subliminal MP3s} Download 3x Subliminal MP3s For Free (\$44.91 Value)
---	--	--

{Keyword: Stop Smoking Subliminal} Stop Smoking With Subliminal MP3s Only \$14.97 + Save up to 50%	{Keyword: Subliminal Weight Loss} Easy Weight Loss With Subliminal MP3s Only \$14.97 + Save 50% Today!	{Keyword: Subliminal Confidence}? Become More Confident With Subliminal Messages - Only \$14.97
--	--	--

* In all of the titles above we have used the {Keyword: ... } feature. This means that the advert title will display the exact search term the person has entered, or if this is too long it will default to the standard keyword.

Keywords

Because our keyword lists and keyword advice is quite long (and ever growing) we have a separate document dedicated to possible keywords which can be targeted.

[View Our Full Keywords Lists](#)

Private Blogs / Websites

There are hundreds and thousands of private webmasters and blog owners who offer various advertising opportunities - everything from banner advertising, to guest posts, to paid blog posts, or an email to their newsletter. There are literally too many to list, but doing a little research yourself can uncover some fantastic, and relatively untapped sources of advertising. To find these yourself try searches like "weight loss blog", "positivity blog", "personal development blog", "hypnosis blog" "hypnosis news" etc.

Final Tips

- Use our "[Affiliate Success Pack](#)" articles first to warm people up.
- Increase your click through rate by **recommending our free albums**: "Click here to receive your 3 **free subliminal audio** albums" / "Click here to download \$44.91 worth of free subliminal audio". Offering a free gift will increase your click through by double or more, and once people join our newsletter to receive their free albums they receive regular emails with further information, product recommendations, and exclusive discounts. Our best conversion rates come from our newsletter subscribers, and **if people you send to us subscribe to our newsletter and purchase through it you will be credited for all sales**.
- **Build your own list**: Having your own list is a powerful tool. Offer your visitors the chance to sign up to your newsletter to receive exclusive free information - how to get the most from subliminal messaging / what they don't want you to know about subliminal messaging / insider secrets to subliminal messaging etc. Email marketing is one of the most effective ways to promote us. With your own list you gain access to people who are interested on a deeper level in subliminal messaging and you can contact them over and over again when we launch new albums, run offers etc.
- **Use deep links**: When you talk about specific problems or areas make sure to use our [deep link generator](#) to send people directly to the related product page. For example if you are talking about losing weight with subliminal messages don't just send people to our homepage, send them straight to our weight loss album.
- **Use testimonials!** We have several testimonials you can take (<http://www.subliminalmp3s.com/feedback>) and re-publish on your website. Or you could write about your own personal experiences with our albums, or publish any comments / thanks you get from your visitors. Testimonials are a great way of adding credibility to any product and using customer reviews and testimonials will increase your conversion rate.
- Make **multiple landing pages**, or a blog based site with multiple pages. This is important so that you can either send people to your homepage for information on subliminal messages generally, or setup other pages for other niche areas / popular products -i.e. "How Subliminal Messages Can Help You Lose Weight" / "How Subliminal Messages Can Help You To Improve Your Confidence". This way you can target your traffic to your specific pages, and from these pages you can send people on to our specific product pages using our [product link generator](#).
- **Keep it simple**. Use soft and simple graphics and a conversation yet "to the point" style of writing. Make your articles easy to read and easy to follow through to where you affiliate links are. Don't over complicate things. Your role is to PRE-sell; to peak interest and send people to us where our website / newsletter does the real selling for you. Just give people a little info, and mention some of the basics and BENEFITS, and send them to us "warmed up".

We pride ourselves on offering great affiliate support. We put our affiliates first - our business is successful because of affiliates like you, and we have structured every element of our business for affiliates; from the checkout system, to the newsletter, to to the design of the website to optimize conversions.

We are always happy to help if you have any questions - please feel free to contact us at affiliates@subliminalmp3s.com
